About Us

Over the last decade, Portland Training has supported thousands of learners with high-quality training across a wide range of sectors. From jobseeker programmes in construction, logistics, retail and digital skills, to free online courses in emerging areas like AI and cyber security, our focus remains firmly on delivering training that makes a real difference.

We continue to offer specialist construction NVQs and support for those leaving the armed forces as they transition into civilian careers. With a 98% pass rate and a fully supported learning journey, our commitment to quality and learner success is at the heart of everything we do.

“

Our Values

Portland Training's values are to be the B.E.S.T. We Believe every individual should have the opportunity to progress. We Encourage every individual to recognise their full potential. We Support every individual to reach their goals. We believe that Together we can!

BELIEVE
ENCOURAGE
SUPPORT
TOGETHER

Jobseeker Courses

Our fully funded jobseeker courses support unemployed armed forces leavers with practical, employer-led training in construction, logistics, retail and digital skills, helping them gain recognised qualifications and move confidently into civilian employment.

Jobseeker Courses

All our Jobseeker courses are delivered live by qualified, experienced tutors. Most are taught online through our virtual classroom, making them easy to access from anywhere. To be eligible for these fully funded courses, learners must be aged 19 or over and either unemployed or employed but earning less than £27,000 per year.

Construction

This fully funded 5-day course gives you the essential training and knowledge to begin working in the construction industry. When you successfully complete the course, your CSCS test and Green CSCS card will also be fully funded.

Logistics

This 5 day, fully-funded Further Your Potential in Logistics courses are designed to prepare you for entry into one of the UK's fastest-growing sectors, helping you build the practical knowledge and workplace skills needed to succeed in a variety of logistics and warehousing roles.

Digital & Cyber Security

This fully funded 5-day courses in digital skills and cyber security build confidence with essential technology and provide the practical, entry-level skills employers value.

Retail

This fully funded 5-day retail courses help you build practical skills and confidence for starting a career in customer-facing roles.

Cleaning

This fully funded 5-day cleaning course builds essential skills and knowledge to help you start a career in cleaning across a range of sectors.

Free Online Courses

Our free online courses offer veterans a flexible way to upskill in areas like cyber security, AI, data science and digital technology, helping them gain confidence and take their first steps into the digital sector.

Free Online Courses

These flexible online courses help learners build essential digital and IT skills in high-demand areas. They can be completed anytime, on any device, making them easy to fit around other commitments.

Computer Hardware Basics

Learn the fundamentals of computer components, how they work together, and how to troubleshoot basic hardware issues.

Operating System Basics

Gain a clear understanding of how operating systems function and how to navigate and manage system settings.

Intro to Cyber Security

Explore the core principles of cyber security, including threats, safe practices and how to protect personal and organisational data.

Certified in Cyber Security

Prepare for entry-level certification with a deeper dive into cyber security frameworks, tools and real-world applications.

Ethical Hacker

Learn the basics of ethical hacking and how professionals test systems to identify and fix security vulnerabilities.

Intro to AI

Get an accessible overview of artificial intelligence, including how it's used in everyday life and industry.

AI Fundamentals

Build on introductory knowledge with core AI concepts, including machine learning, automation and data processing.

Intro to Data Science

Discover the role of data in decision-making and gain hands-on experience with data analysis tools and techniques.

ELCAS Funded IT & Digital Courses

We offer ELCAS-funded digital and IT courses for armed forces leavers, from basic Microsoft Office to advanced CompTIA certifications in cyber security, AI, cloud and data, supporting their transition into in-demand civilian careers.

AI Courses

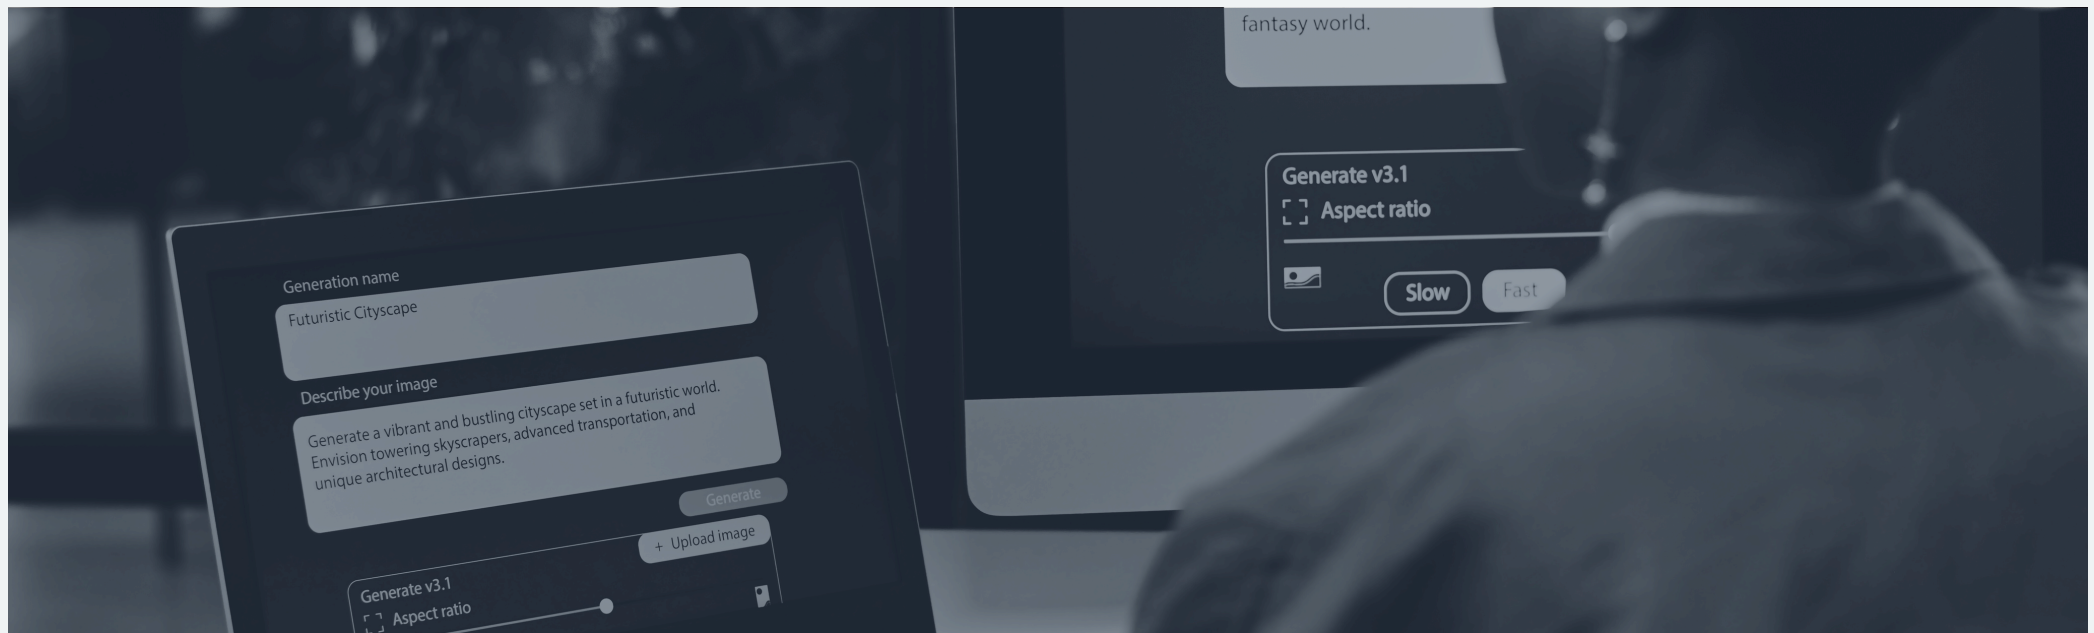

Our online, self-paced AI courses are designed to help you explore the foundations of artificial intelligence, machine learning and automation, with the flexibility to learn when and where it suits you.

CompTIA AI Essentials

This course introduces the core principles of artificial intelligence, including machine learning, natural language processing and ethical considerations, ideal for those starting their AI journey.

Pearson IT Specialist Artificial Intelligence

Aimed at beginners, this course covers the fundamentals of AI concepts and applications, helping learners understand how AI is developed and used in real-world scenarios.

Cloud Courses

Our online, self-paced cloud computing courses cover foundational concepts and specialist skills, helping learners build expertise in platforms like Microsoft Azure and CompTIA-certified environments. They provide practical knowledge to manage and secure cloud infrastructure, preparing learners for roles in the growing cloud technology sector.

Azure Fundamentals

A beginner-friendly course that introduces core Azure services, cloud concepts and security, ideal for those new to cloud computing.

Azure Administrator

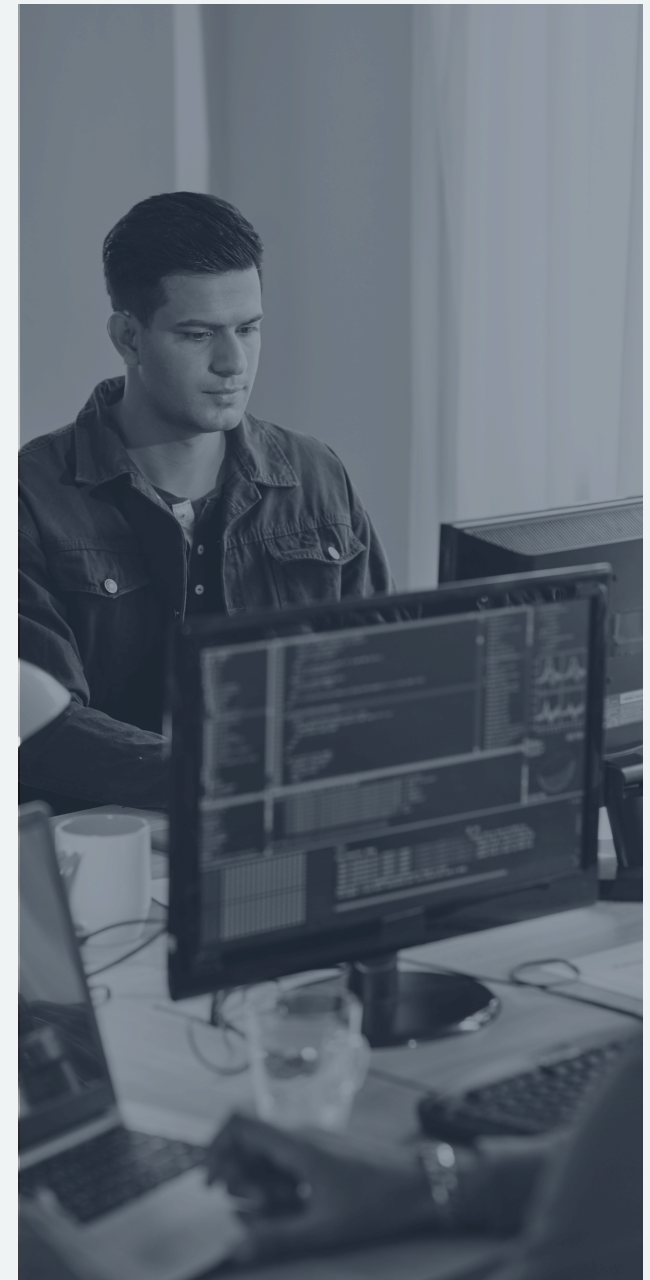

Learn how to manage Azure subscriptions, services and resources in this hands-on course aimed at future cloud administrators.

CompTIA Cloud+

A technical certification course that teaches how to deploy, maintain and troubleshoot cloud infrastructure and services across multiple platforms.

Azure Developer

This course focuses on building, deploying and maintaining cloud applications using Microsoft Azure, designed for aspiring cloud developers.

Data Courses

Our online, self-paced data courses are designed to help learners build the practical skills needed to work confidently with data. From analysis and reporting to database management and visualisation, these courses prepare you for real-world roles in today's data-driven workplaces.

CompTIA Data+

This course covers the core skills needed to collect, analyse and interpret data, making it ideal for those pursuing entry-level data analyst roles.

CompTIA DataSys+

Focused on data system administration, this course teaches how to manage, secure and optimise data systems for business use.

Microsoft Power BI Data Analyst

Learn how to model, visualise and analyse data using Power BI, with hands-on training aligned to real-world business intelligence tasks.

IT Infrastructure Courses

Our online, self-paced IT Infrastructure courses provide the essential knowledge and hands-on skills needed to support, manage and optimise modern IT systems, making them ideal for those starting or progressing in technical support and network roles.

CompTIA Tech+

A foundational course for those new to IT, covering basic hardware, software and troubleshooting skills required for entry-level tech roles.

CompTIA A+

Widely recognised in the industry, this course develops essential skills in device configuration, troubleshooting, and IT support.

CompTIA Network+

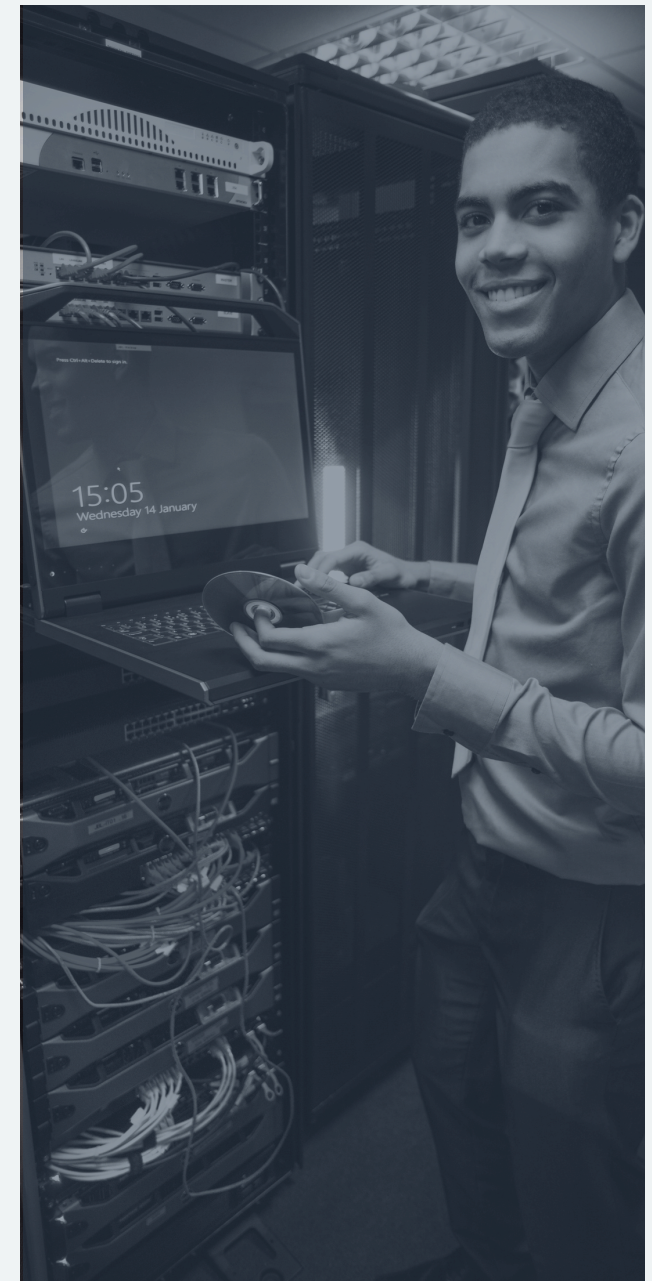

This course builds core networking knowledge, including configuring, managing and securing wired and wireless networks.

ITIL 4 Foundation

Learn the key concepts of IT service management and how to align IT services with business needs using the ITIL 4 framework.

Pearson Device and Configuration Management

A beginner-level course that introduces managing devices, users and security settings across various operating systems and environments.

Cyber Security Courses

Our online, self-paced cyber security courses are designed to equip learners with the skills to protect systems, detect threats and respond to cyber incidents, supporting progression into one of the fastest-growing areas of the digital sector.

CompTIA Security+

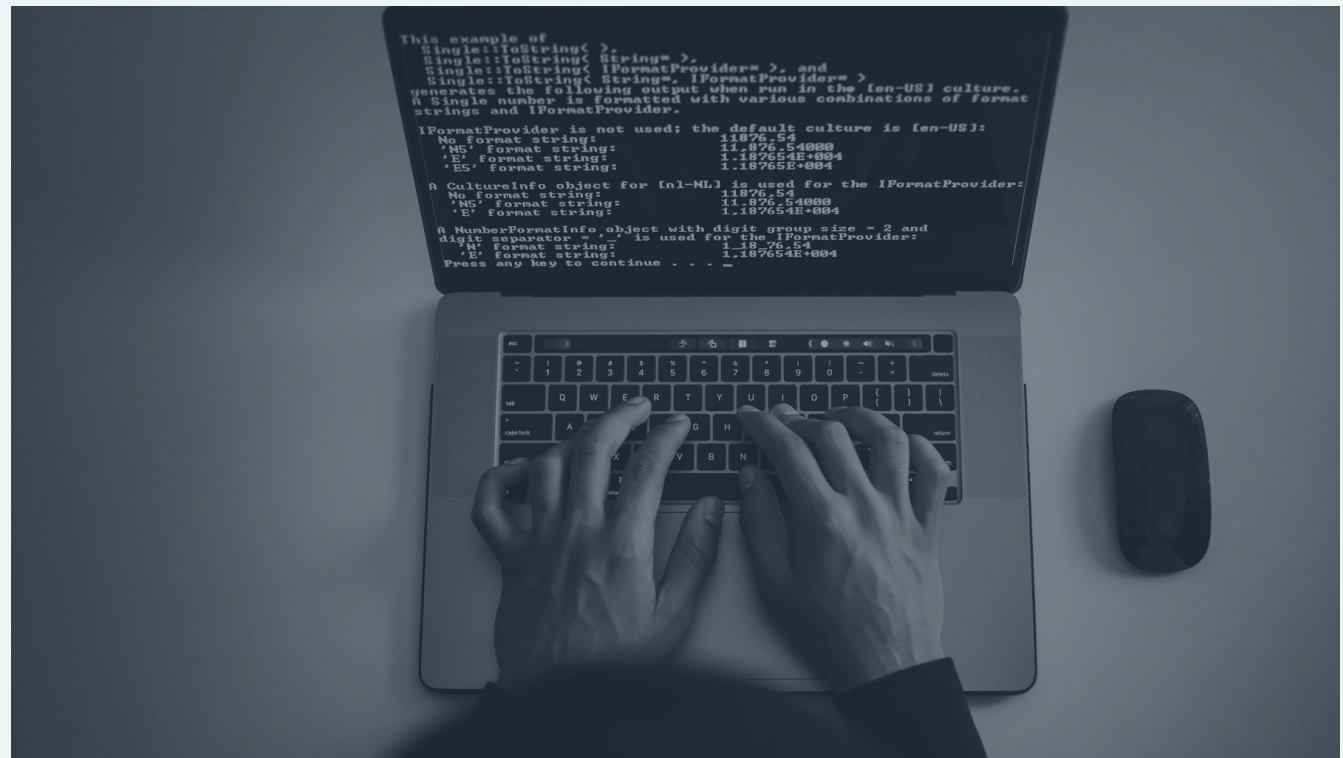

A widely recognised entry-level course that covers essential principles of network security, threat management and risk mitigation.

CompTIA CySA+

Focused on threat detection and response, this course develops the skills needed for cyber security analysts working with security operations and monitoring.

CompTIA PenTest+

A practical, hands-on course that teaches how to identify and exploit vulnerabilities through authorised penetration testing and ethical hacking techniques.

Programming Courses

Our online, self-paced programming courses introduce learners to the core languages used in modern software and web development. Whether you're starting from scratch or looking to strengthen your coding foundations, these courses provide hands-on experience in writing, testing and understanding code using widely used languages like Python, Java, JavaScript, HTML and CSS.

Pearson Java

Learn the basics of Java programming, including object-oriented concepts, syntax and logic used in building desktop and mobile applications.

Pearson HTML & CSS

Develop the essential skills to structure and style web pages using HTML for content and CSS for layout, design and responsiveness.

Pearson Python

A beginner-friendly course covering Python syntax, data types and basic programming logic, widely used in web development, data science and automation.

Pearson JavaScript

This course introduces the fundamentals of JavaScript, enabling learners to create interactive features and dynamic functionality for websites.

CompTIA Bundles

Our online, self-paced CompTIA bundles offer great value for learners looking to build a strong foundation across multiple areas of IT. Each bundle combines complementary certifications to maximise learning and career opportunities while helping you get more for your money.

IT Fundamentals & Cybersecurity Bundle

CompTIA A+, CompTIA Network+, CompTIA Security+

This bundle provides a solid introduction to IT support, networking and cyber security, ideal for launching a career in general IT infrastructure or technical support.

Cyber Security Bundle

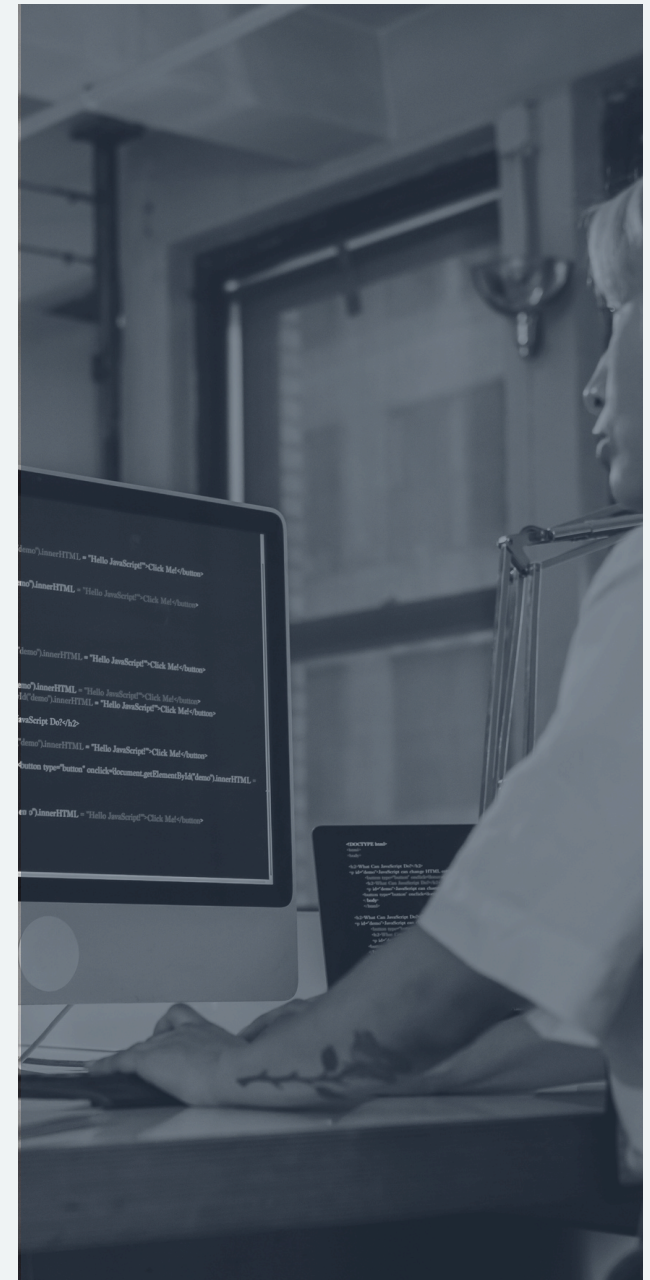

CompTIA Network+, CompTIA Security+, CompTIA Pentest+

Designed for those pursuing a career in cyber security, this bundle covers core networking concepts, essential security principles and advanced penetration testing techniques.

Data Analytics & Systems Bundle

CompTIA DataSys+, CompTIA Data+

Perfect for those interested in working with data, this bundle covers both data management and data analysis, combining technical system knowledge with practical analytical skills.

Construction NVQs

We offer a full range of Level 2 to Level 7 construction NVQs covering trades, plant operations, supervision and management. Learners must be working in a relevant role to gather evidence from real experience. Our team supports them throughout, with many courses eligible for ELCAS funding for armed forces leavers.

Construction NVQs

Our construction NVQs, ranging from Level 2 to Level 7, are onsite assessments designed to recognise practical skills and support career progression across a wide variety of roles in the construction industry. Learners must be currently working in an appropriate role to gather the required evidence from real work experience.

Level 2 NVQs

Ideal for tradespeople and operatives, Level 2 NVQs certify competence in practical tasks and are typically associated with the Blue CSCS Skilled Worker card.

Level 3 NVQs

Focused on skilled trades and supervisory roles, Level 3 NVQs demonstrate advanced knowledge and supervisory experience and correspond with the Gold CSCS Supervisors or Advanced Craft Card

Level 4 NVQs

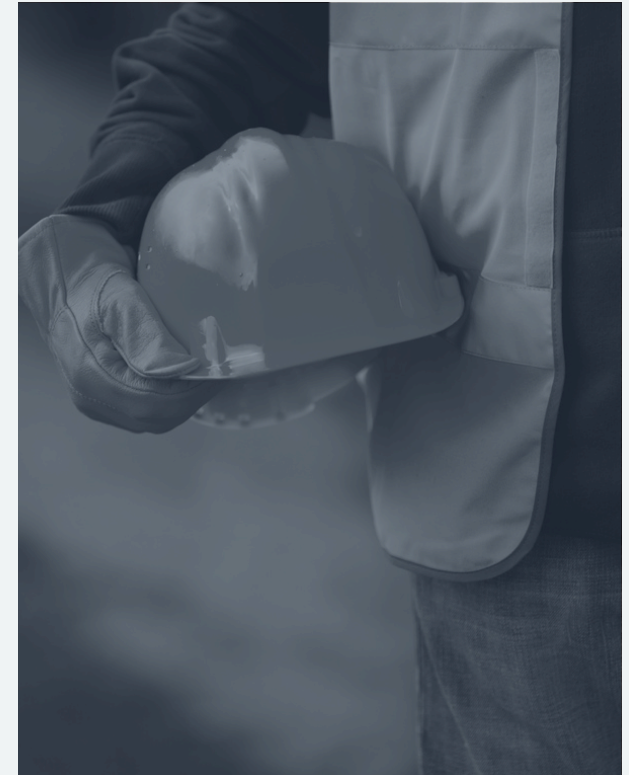

Designed for site supervisors and technical specialists, Level 4 NVQs validate management and coordination skills, linked to the Gold CSCS Supervisor card.

Level 6 NVQs

Targeted at construction managers, Level 6 NVQs assess strategic planning and leadership, aligned with the Black CSCS Manager card.

Level 7 NVQs

The highest level for senior managers and directors, Level 7 NVQs recognise expertise in organisational leadership and complex operations, associated with the Black CSCS Managers Card.
